

# 2023 ACCOMPLISHMENTS

## RESEARCH

In 2023, CKc invested more than \$1 million in research grants including **\$530,000 awarded to new projects** to be paid out over the next three years.

**Dr. Tanja Gruber**  
Stanford University

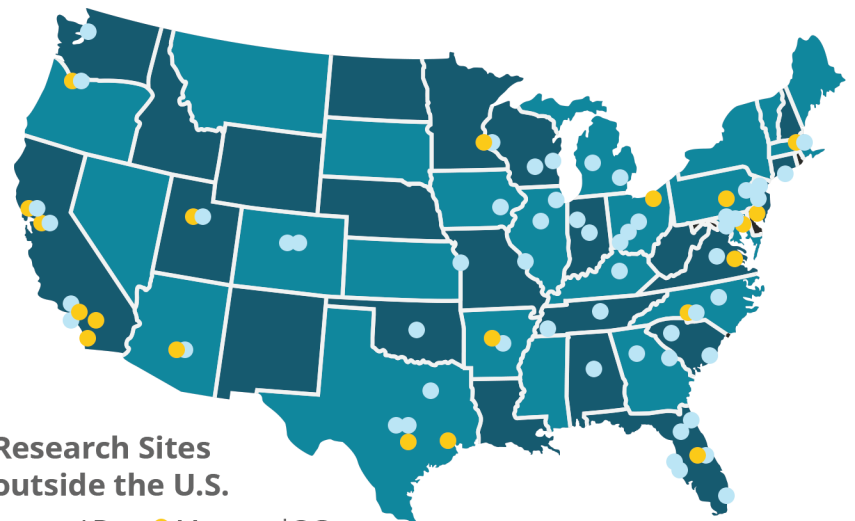

**Dr. Kathryn Lemberg**  
Johns Hopkins University

**Dr. Anya Levinson**  
University of California, San Francisco

**Dr. Amy Sexauer**  
Dana-Farber Cancer Institute

**Dr. Brian Tullius**  
AdventHealth Orlando

### Research Sites in the U.S.

#### Research Sites outside the U.S.

- |                |               |                 |
|----------------|---------------|-----------------|
| ● Calgary AB   | ● Montreal QC | ● Newly Awarded |
| ● Edmonton AB  | ● Quebec QC   | ● Existing      |
| ● Vancouver BC | ● Zurich ZH   |                 |

| ● Ottawa ON    |               |                 |

Thanks to our recruitment efforts, CKc's applicant pool has grown for the third year in a row. To accommodate this increase in applications, CKc has also increased our Scientific Advisory Board (SAB) from four to eight members. To view our SAB or a full list of CKc-funded research, visit our website, [cannonballkidscancer.org](http://cannonballkidscancer.org).

# 2023 ACCOMPLISHMENTS

## EDUCATION

Since pediatric cancers are different from adult cancers, giving children adult cancer therapies results in multiple life-threatening side-effects to cancer treatments. Like outdated, ill-fitting hand-me-down clothes, adult cancer therapies just don't fit kids' bodies. **But while second-hand clothes might be vintage and cool, treatments should be tailored to fit the individual.** Research is the key to understanding the biology of childhood cancers. This was the focus of our education campaign **One Size Doesn't Cure All**. To view the full campaign, visit [cannonballkids cancer.org](http://cannonballkids cancer.org).

## IMPACT TO DATE

<b>787</b>	<b>\$3.9 MIL</b>	<b>36</b>	<b>94%</b>
Options Created	Grants Awarded	Grants Awarded	Clinical Trials are First-of-their-kind

**Together, we continue to seek and fund innovative, first-of-its-kind research and educate for change among the public. YOU are changing the status quo for childhood cancer! THANK YOU!**
